WHO WE ARE

Team 8841 is a community-based nonprofit organization dedicated to introducing STEAM education to high school students in the greater Orlando area. With the help of our volunteer mentors, we teach our students the value of teamwork, dedication, and perseverance as we guide them through the engineering and design process.

WHAT WE DO

Students in our program have the opportunity to learn about foundational concepts relating to:

- Mechanical Engineering
- Electrical Engineering
- Software Engineering
- Business and Marketing Principles
- Public Speaking and Presentation
- Visual & Graphic Design

MEET TEAM 8841

During the 2024-25 season, our team consisted of 35 students from grades 9-12. In order to maintain team status, members participated in community outreach events throughout the greater Orlando area. Our team builds relationships between students and industry professionals, creating scholarship and internship opportunities for students as our team seeks to build a stronger community and a brighter future through STEAM.

Under the guidance of Lead Mentors Marcus Robinson and Phu Nguyen, Team 8841 OTTER has become an award-winning organization, taking home the Imagery Award for branding and design as well as the Quality Award for workmanship on the 2025 robot, Otter-Ray. The shift from school-based team to community-based team allows us to expand our reach and serve more students from a variety of backgrounds while designing and building a competitive robot for the upcoming season.
